and Fridays, at Lewisburg, Union Co.Pt. James Watt, in 1805.

#### THE CHRONICLE. MONDAY, DEC. 5, 1858.

Transland from the French for the Louisbare Chemist

LIGHTING BY SAS.

There was a time, (and that, not so very long ago,) when people were desired to streams of light. The ancient appurtenanold street-lamp, suspended by cords, waring in mid air ; the candelabras, surpassed by pretty lanterns of crystal, have been removed, and the brilliant light of the gos penetrates into distant corners. It is the gas light, in the handsome stores, which makes their brilliant goods more enticing

The origin of this beautiful light, which traverses by its subterraneau pipes so many of our cities, may be unknown to many of our readers. Lighting by gas follows very readily the chemical discoveries made within the last century.

We knew long sings that the cambus: anied by light and heat; and since the wenteenth century, it has been shown by monstration, that oil placed in closed

and submitted to high temperature, a gas capable of barning with cy. But, until the close of the last only no one the' of making practical ca of obtaining light from the combuble gwes which were formed during the decomposition of certain organic substanne years afterwards that it was revived (stealing) of the Mortara boy. were very imperfect; and it was not until

The Semisburg Chronicle, engineer named Murdoch, cognizant of the It is said that the French ambassador practice in England, where gas light was that he would say neither more nor less first established, in the manufactory of than his rettore imposed on him to say.

German, named Winsor, set about improving it; he obtained a patent in England result of his judgment is much feared. for the invention, and formed a society for making it for public use. He had many obstacles to contend with : custom must be rooted up; the old manufacturers threatened the new luminary; the fear of besides all this, it had as yet reached but a very imperfect state. But Winsor failstrane of the Phinal Mails, and sample materials for most od not for courage; he provoked inquiry, the strong PRINTING, which will be exceeded with To those who were varnishers by trade, he To those who were variable to you handed an deliver, and the series of t WORDEN & CORNELIUS. perior in lustre to all others; and to the calkers of vessels, that Winsor's tar was worth more than all others ever known. The police agents he assured that it would be a powerful auxiliary, for by its light they would better detect a rogue. That which cave weight to these testimonies. and especially arrested the attention of Parliament, before whom the investigation place their candles in their windows when, was held, was the fact that the establishupon returning home, the great lords and ment of this new system of light would ladies were preceded by their servants probably cause greater demands for the bearing torches, while the citizen and his coal of the country, besides producing tar, wife illumined their way by the aid of a mineral cils, and sal ammoniae, all of little horn lantern, a specimen of which which would prove profitable. Success may now be found among antiquarians, crowned the persevering efforts of Winsor Now, six thousand gas-burners illumine -the city of London was then lighted by the vast city, and flood the pavements with gas, and the new system gained so much favor, that, in 1820, the company founded ces have disappeared; we no longer see the by Wirs r had themselves laid 150 miles of

> needs re pass the Channel; and, in 1815, Winser visited France, and tried to create an interest in favor of the enterprise; but he met with an almost universal resistance. He was menaced by the sacans, and the witty Charles Nodier was particularly conspicuous for his sprightly sallies. Winsor tried to answer them, but his arguments failed of conviction; he then essayed the medium of the senses, and raised an establishment on a small scale. The exhibition had the desired effect; it became popular, and was soon introduced at the Royal enterprise. Gradually it gained ground, and finally resulted in the abandonment of the old modes of light, whose imperfections could not compete with it. The introduction of gas in the city of Paris alone, has been at a cost of \$500,000,000.

Calculation shows us that wax-candles it. It was Philip Lebon, an inge. are six times dearer than gas light, that oil icus Fonce man, who first formed the is nearly twice as expensive as gas, and common candles two-thirds.

# THE MORTARA CASE.

[Sir Moses Montifiere, President of the res. The means employed at this time, London Committee of Deputies of the for applying to light, the gas obtained British Jews, has transmitted to the Heom the decomposition of wood or coal, brew congregations in this country, the

> have been invoked for the restoration of the boy to his parents. The Hebrews in America, with one consent, and in a spirit honorable to human nature, join in condemnation of this Papal proceeding-this violent infringement of the rights of concience-this invasion of the sanctity of the household circle. We would ask them, and all others who participate in this chullution of righteous indignation, " If it be such a crime to abduct one child from its parents, under the plez of doing it good, what must be thought of a SYSTEM which -professedly for the good of the captive -yearly takes thousands of children (in Africa and in America) from the arms of their parents-parents, too, whose children are almost their only comfort ?"..... This outrage, we trust, will induce our Hebrew ellow citizens, in this land of refuge for that people, to sympathize more deeply with the many thousands similarly afflicted, and lead them to exert their influence against the spread and perpetutiv of a system which wars continually against the common humanity.

To His fioliness, Pius II., on the Abduction of the

BY JAMES AIKEN. Give the Hebrew back his child! Don't disgrace the Christian name By a theft, so base, 'twould make E'en barbarians blush with shame

So, then I servant-maids and priests, By a holy coup d' ciat, God's regenerating power Into " flat burglary" may draw!

Thus they rob the Hebrew dame Of her sweet, maternal joy; Thus Tradition ever toils God's commandments to destroy.

Scores and scores of years ago. . Recruiting sergeants, never slow Hit a bright expedient then :

Sergeant slyly slips a shifting In his pocket: then 'tis clear He's the King's-though all unwilling!

So the maid, with holy oil, Dauls a Jewish haby's face; And said Jewish baby, then, Altogether shifts his place.

Little, squalling " Jew" no more, He's the Church's " favorite son, To Saint Peter's lofty chair Now his journey is begun! Only think, what gracious power

To the Holy Church is given! Sical the babies! that's the way To bring these stubborn souls to Heaven Kidnap in the name of Christ?

Now -in this enlightened age Pio Nino! cast cast thine eye Forward o'er the awful page, Which the calm historian's pen,

In the future times shall trace; How will then enlightened men Scowl upon thy sculptured face! Thou vicegerent of the Lord! Two! And steeling balies, too!

Will not Satan's scribe record Something for thy service due Give the Hebrew back his child! disgrace the Christian name By a theft, so base, 'twould make E'en barbarians blush with shame'.
